

Observing-R

Manual / Guided Tour

Observing and Coding Retrospectively

English Version: 26 May 2021

Prof. em. Dr. Gerhard Faßnacht

Contents

Preface

1. Creating a New Project
2. Managing the Catalogue
 - 2.1. Terms in the Catalogue
 - 2.1.1. Adding Terms
 - 2.1.2. Editing a Term
 - 2.1.3. Adding a Code-System (List)
 - 2.1.4. Classifying Codes into a Code-System (List)
 - 2.1.5. Undo a Classification
 - 2.1.6. Adding Directly Codes to a Code-System (List)
 - 2.2. Templates
 - 2.2.1. Creating a Template
 - 2.2.2. Copying Templates
3. Running an Observation Task (Template)
 - 3.1. Open the Retro Observation Window for Coding
 - 3.2. Start Coding
 - 3.3. Adding New Codes to a Running Observation Task
 - 3.4. Saving an Observation Session
 - 3.4.1. Viewing Saved Data
 - 3.4.2. Editing Terms after Data have been Saved
 - 3.4.3. Editing Templates after Data have been Saved
 - 3.5. Editing Time Values
 - 3.5.1. Editing From Date and Back Date
 - 3.5.2. Setting the Duration of Retro Events
 - 3.6. Processing Retro Data
 - 3.6.1. Computing Basic Statistics
 - 3.6.2. Printing the Basic Statistics Table and Making a PDF
 - 3.6.3. Exporting Basic Statistics
 - 3.6.4. Drawing Basic Statistics
 - 3.7. Filtering Retro Data
 - 3.7.1. Example: Setting Code and Weekday Filter
 - 3.7.2. Setting Day Time Filter
 - 3.8. Uploading Observation Tasks to iCloud
4. Working with the Lexicon
 - 4.1. Human Specification Category
 - 4.2. Attribute Specification Category
