

Live Observation Auto-renewable Subscriptions

Auto-renewable subscriptions provide access to content, services, or premium features of the app on an ongoing basis. They automatically renew at the end of their duration until the user chooses to cancel. There are three subscriptions: Basic, Standard, Premium. All with the **same** content. The only difference lies in the levels of permissions, i.e. Number of Users , Number of Projects, Number of Templates and Number of iPhones that can be configured.

- **Number of Users:** to access the app user must define a personalised *User Access Name* and *User Access Password*.
- **Project:** A project is a container that comprises the whole terminology needed to define templates.
- **Template:** A template is a definition of an observation task.
- **iPhones:** iPhones can be configured to run a template that was defined on a the master app, i.e. a macOS app.

	Basic	Standard	Premium
Number of Users	1	2	Unlimited
Projects that can be set up	1	2	Unlimited
Templates that can be defined	2	8	Unlimited
iPhones that can be configured	2	8	Unlimited
Installation	Single computer	Single computer	Single computer
Target Group	Private use	Small and medium business	Science Institutions Companies
Subscription duration	3-months subscription	6-months subscription	1-year subscription
Subscription price	\$5.99	\$29.99	\$239.99

Renewal extensions are excluded from days of paid price. **Upgrade** and **downgrade** between the different subscriptions is possible. Upgrading a current subscription takes effect immediately. The prorated amount of the original subscription is refunded. Downgrading continues the current subscription until the next renewal date, then it is renewed at the lower level and price.
